### TESTIMONY

"L.E. Myers has utilized BMCW on several Ameren projects, due to their excellent customer service, issue resolution, and on-time delivery of equipment. The relationship has been mutually beneficial, as L.E. Myers has provided BMCW with a strong continuity of business, helped the company grow considerably over the past few years. L.E. Myers has also helped BMCW open to the door to new clients and opportunities, as BMCW has participated in Ameren events that have exposed the company to new business prospects."

We have utilized BMCW for every major project we have had over the past 3 years and plan to keep using them in the future. The great working relationship and fair treatment has kept us coming back consistently as our first point of contact for the rental equipment that BMCW provides. BMCW is great in communicating with us and working with us to correct the inevitable wear and tear and damages that we do. We feel that BMCW has been more than fair and straight forward in this area. Additionally, BMCW has reached out multiple times to see what other equipment needs they can help support our operations with. We appreciate them looking for other ways to help us and work together.
